

CITY of CALABASAS

**CITY OF CALABASAS  
Public Works  
Department**

The City of Calabasas established a traffic mitigation fee program to help fund traffic improvements needed to address traffic volume growth in the community due to future land development or redevelopment.

The fee from this program allows for development to proportionally and fairly share this financial burden and allows the City to construct some of the transportation improvements identified in the General Plan Circulation element.

Resolution No. 2024-1337 establishes the current Traffic Mitigation Fee District and fees are updated annually.

Public Works permit applications and documents are submitted electronically through the [online portal](#).

**Applications submitted without all of the required information will be denied and returned to the applicant.**
